Letter of Recommendation

30/08/2021

To whom it may concern,

On behalf of the Cambridge Centre for the Integration of Science, Technology and Culture (CCISTC) at the Department of Psychology, University of Cambridge, I'm pleased to write this reference for Chuangchuang Ran. Ran attended the Online Research Programme in Robotics and Smart Manufacturing organised by CCISTC. Students participated in this programme generally benefit from the academic lectures and research guidance provided by the invited lecturers and supervisors from relevant subject(s).

Ran's enthusiasm throughout the programme has been exemplary. Ran's engagement in the programme and exposure to world-class scholars have expanded Ran's subject based knowledge as well as nurtured Ran's research skills. This opportunity has also enabled Ran to collaborate with others in a multicultural background, as well as produce an outstanding piece of research project independently.

The supervision model has also been added to the Online Research Internship Programme for student's better understanding of the programme academic content, development of professional skills and encouragement of critical thinking, which will be invaluable for further studies or employment.

Sincerely,

Dr. R. Michael Zhou

Executive Director

Cambridge Centre for the Integration of Science, Technology and Culture (CCISTC)
